

## **Architectural Engineering Program Educational Objectives:**

The following long-term Program Educational Objectives have been developed with the input of the OSU School of Architecture's faculty, Architecture Advisory Board, and Professional Advisory Committee. These objectives are expected accomplishments of a majority of our graduates a few years after graduation.

Our graduates will:

- 1) Be successful in pursuing a graduate degree if they choose to continue their education past a Bachelor's degree.
- 2) Utilize the close relationship with the architecture program to develop a special ability to collaborate on interdisciplinary design teams.
- 3) Excel in their careers by displaying leadership, initiative, ethical character, technical ability, and engineering skills.
- 4) Utilize their education in architectural engineering to contribute to society as licensed professional engineers.
- 5) Maintain membership in professional organizations, have an awareness of emerging technologies in the field, and have a positive attitude towards advancing their professional skills through life-long learning.
