*After careful deliberation, the Technical Advisory Committee(TAC) has determined that the fees for each module should be increased for the first time since 1999. Effective July 31, 2026 the fees for each module will be raised by an average of approximately 27 percent (Individual module fee adjustments may vary due to rounding.) This increase is necessary to keep up with rising costs and to maintain the current level of funding provided by ODOT. The fees for each module remain low compared to similar training offered around the country. A fee schedule showing module fee prior to July 30, 2026 compared to module fee after July 31, 2026 is shown here. The HCMTP TAC remains committed to providing quality training at a reasonable cost.
