FIRE PROTECTION AND LOSS CONTROL PROGRAMS

Presented by CEAT Professional Development,
The Oklahoma State University Department of Fire Protection
& Safety Engineering Technology

Property Loss Control for Insurance Property Specialists (PLC)

July 14th-18th

October 6th-10th

36 Hours | 3.6 CEUs
\$1550 per person

This 36-hour course features practical training that emphasizes testing and evaluation of fire suppression systems. Through classroom presentations, laboratory sessions, and field demonstrations, attendees will learn to evaluate fire protection systems, their components, and designs; in order to evaluate loss control risks in commercial and industrial buildings per NFPA standards. Key topics include water supply, fire pumps, automatic sprinkler components and testing, sprinkler design techniques, alarm and detection systems, special hazards, and protection of warehouses.

**Light refreshments included*
**FPTC Elective Requirement*

Fire Pump Applications, Inspection, & Testing (2.5 Day)

August 20th-22nd

November 5th-7th

20 Hours | 2.0 CEUs
\$1100 per person

OSU's 2 ½ day fire pump course addresses NFPA 20 provisions, a thorough review of installations; applications; and standard inspection, testing, and maintenance procedures. The course provides a solid knowledge of common pump types, various pump drivers, controllers, installation components, and accessories. Practical exercises and a live hands-on demonstration improve your ability to conduct field acceptance tests. Other topics include routine installation testing, determining proper pump sizing, graphically analyzing pump performance, and implementing the correct inspection and maintenance procedures. **Light refreshments included*
**FPTC Elective Requirement*

Fire Sprinkler Inspection Training & Certificate Program (FSITC) (3.5 Day)

August 5th-8th

28 Hours | 2.8 CEUs
\$1700 no hotel package | \$2200 w/ 4-night hotel package
Special AFSA member discount available

This joint effort between the AFSA and OSU is a comprehensive program designed for fire sprinkler contractors. It takes the sprinkler inspector through the NFPA 13 and 25 requirements of proper inspection, testing, and maintenance of the most common types of automatic sprinkler systems. During this 24-hour course, students receive classroom and laboratory sessions that have proven to be invaluable to past participants. The hands-on portions include wet and dry valve operations; trip and main drain testing; resetting valves; flow testing of a hydrant; and fire pump testing.

**Lunches included* **FPTC Core Requirement*
***Hotel package is SpringHill Suites in Stillwater*

Inspection, Testing, & Maintenance of Automatic Sprinkler Systems (IT&M)

August 18th-19th

November 3rd-4th

20 Hours | 2.0 CEUs
\$1050 per person

How well does your company comply with NFPA 25 standards for inspecting, testing, and maintaining water-based fire protection systems? OSU's two-day workshop features hands-on laboratory training with automatic sprinkler systems and expert instruction to bring you up to speed on the latest standards. The workshop agenda covers acceptance rates, visual inspections, functional tests, impairments and system restoration, component and assembly maintenance, procedures, and practices.

**FPTC Core Requirement*
**Light refreshments included*
***\$150 discount when taken as a combo with Pumps*

Fire Alarm & Detection Systems

December 9th-11th

20 Hours | 2.0 CEUs
\$950 per person

This OSU seminar offers the essentials of maintaining fire alarm and detection systems in a reliable, responsive condition. The program acquaints participants with the systems for which they are responsible and those they may encounter. Participants explore operational how's and why's on a variety of systems, learn to recognize limitations, and understand causes of system failure.

**Light refreshments included*

**FPTC Elective Requirement*

Fire Protection Technology Certificate program (FPTC)

The Fire Protection Technology Certificate program (FPTC) is an extensive certificate program designed to guide the fire professional through training in all the major areas of fire protection. The mission of the FPTC program is to serve a wide variety of fire professionals by developing a well rounded curriculum which will allow individuals to become knowledgeable in the fire protection field. This certificate program will allow individuals to expand their current background in fire protection and learn new technologies which will change fire protection for the future. To complete the program, four core courses and two electives must be completed. Each course will be completed through CEAT Professional Development or OSU Correspondence Education and shall satisfy that course requirement. Maximum completion time is four years from the date of application enrolling in the program.

Customized Courses

Customized training can be developed for your organization to provide live classes at your facility, here at OSU, online courses, or blended programs. Whether you are interested in a topic listed on our website, need a combination of courses, or require other specific concentrations in engineering, architecture, or technology; our team specializes in tailoring customized training to provide just what you need. OSU training can also include topics explicit to your industry and group discussions on how your team will incorporate this new knowledge into your existing practices.
