Wind Tunnel Level 2 Certification

To gain level 2 certification for the wind tunnel, you must complete these steps:

i. Go onto the Endeavor's online classroom page and use the Sign up Genius link located under the **Level 2** Tab
ii. Sign up for a 1-hour long training session
iii. Attend the session and get your white Endeavor card hole punched afterwards and be sure you are successfully signed up for Lab Agenda (which will be explained at the training session)

Completing this process will result in access to the wind tunnel while only being supervised intermediately and you will be required to get all experiments/projects approved by a TA/level 4 certified individual before testing.

After the training session, you will be added to the Lab Agenda page, which using Lab Agenda will be covered during the training session. You will be shown how to reserve the wind tunnel as well as how to submit information about your experiments/projects so that they can be approved.

If you need further help, contact information for those that are available to help will be under the Wind Tunnel tab as well.
