

Conference and Seminar Rooms: Inspiring collaborative learning and innovation spaces for our students and faculty.

The MAE Conference Room is flanked by the mechanical and aerospace student leadership centers, reminding our students to take the big step from student leader to industry leader and reminding our faculty to lend a hand to our students as they make that step!

The MAE Seminar Room is a state-of-the-art broadcast and recording studio designed to facilitate conversations between our students and online mentors—industry leaders, alumni and faculty colleagues from around the world.
