

# *The Zink Center Leadership Seminar Series*

**“My Story: How to Build, Lead and Sustain a Successful Business”**

**Dr. Fazel**

Accurate Environmental, LLC is one of the largest environmental companies in Oklahoma and was established by Dr. Ali Fazel on November 30, 1990 in Stillwater. The company began with two part-time employees providing laboratory and environmental services. Today, the company has expanded to almost 60 employees at three locations—Stillwater, Tulsa and Oklahoma City with annual sales of \$10 million. Being one of the most sophisticated facilities in the country with highly skilled and experienced environmental scientists, Accurate Environmental has frequently been involved in laboratory research and method development for the environmental industry. Accurate Environmental is comprised of five interrelated service divisions (Environmental Laboratory, Environmental Training, Laboratory Supplies, Engineering Services, and Field Services) that no other single environmental company offers, making them one of the most unique environmental service providers in the nation.

Dr. Fazel and his company have deep roots at Oklahoma State University. He is an OSU graduate with a Ph.D. in Environmental Engineering. About 75 – 80% of his staff are OSU graduates. Dr. Fazel has also developed a partnership with OSU to allow students to use Accurate Labs’ testing services for university research projects. In 2018, the OSU College of Engineering, Architecture and Technology (CEAT) inducted Dr. Ali Fazel into the CEAT Hall of Fame.

**Tuesday, November 12, 2024**
